MOBILE BADGE BLE NFC APP

BY ELATEC GMBH

The Mobile Badge BLE NFC app provides a unique ID for your mobile phone to act as a virtual ID card. Appropriately configured ELATEC readers can read that ID, and the app can complement traditional plastic cards in applications such as secure print release or user authentication. NFC communication works with every ELATEC TWN4 reader, and Bluetooth® (BLE) communication works with BLE-enabled ELATEC readers. The ID for a mobile device remains the same, regardless of the communication channel (BLE or NFC).

General Requirements

+ ELATEC TWN4 reader for NFC functions; BLE chip and B-Option for Bluetooth/BLE functions
+ Reader firmware version V3.22 or higher

Special Requirements for Android phones

+ Android 5.0 or higher
+ Bluetooth V4.0 or higher (for Bluetooth/BLE functions) and NFC module (for NFC functions)

Special Requirements for Apple iPhones

+ iOS 11 or higher, iOS 13 or higher recommended
+ Wallet pass for NFC function plus TWN4 reader with A-option
